

Training

PharmOut offers tailored onsite training courses to the pharmaceutical, life science and medical device industries.

Training teams together allows them to consider real-life issues during the session. It also helps change management as everyone has the same understanding of what is required.

Understanding and implementing GLP

Overview

Pharmaceutical manufacturers have to comply with the various GLP regulations, according to the destination countries of their products.

Participants in this training course will learn practical and affordable approaches to compliance with these regulations.

They will also learn how to avoid common mistakes and aspects of the regulations to focus on according to their operational needs.

Who should attend?

- Business unit managers
- Operational Managers
- Technical Management
- Quality and regulatory professionals
- Management representatives
- Internal auditors

Expected outcomes

After completing this training course, participants should be able to:

- Understand which sections of the regulations apply to their role.
- Understand what actions they need to take to comply.
- Be able to use the regulations to guide their decision making

Length

One full day on your site.

Pre-requisites

Participants should have a basic understanding of Quality principles. They need not be familiar with GLP regulations.

Assessment

Participants will be assessed during the training.

What's included

- A student manual
- Forms, templates, and worksheets
- Certificates upon completion of course requirements

Cost

\$3000 for up to 15 participants
